

**UNIQUE**

**INNOVATIVE**

**SAFE**

SINCE 1965 MACS ENGINEERING has continuously provided safe, robust, reliable and innovative solutions for our customers. We work closely with independent engineers, research institutes and other like minded companies to ensure our products are always cutting edge, highly effective and, importantly, safe.

## MACS DESIGNED EXCAVATOR / HEAVY EQUIPMENT BELLY GUARDS

At MACS, we know that safety is critical. Our heavy equipment belly guards are a cut above the rest, meeting both our clients' stringent demands as well as Australian standards to ensure the highest level of safety and performance.

- Designed, built and certified for most OEM equipment and also for specialised equipment requirements
- Robust construction utilising one piece pressed design and smoother profile providing greater coverage
- Quick release for major servicing with two centre safety chains
- Centre inspection hatch for easier access
- Certified and load rated mounting lugs
- Extensive guarding helps protect critical equipment components by deflecting debris from rising upward along the chassis
- Enhancing maintenance and machine productivity by reducing downtime
- Reduces equipment underside wear

Part No: BG36-6  
Description: HITACHI EX3600-6
