

SPECIALIST: The MACS Engineering truck workshop.

Expansion plans are on target

New workshop to service mining, energy industries

MACS Engineering has expanded its auto electrical and fitting capacity, with the opening of its new workshop at 17 Milton St, Mackay.

The workshop opened its doors on Monday, May 9, as part of a planned expansion to create extra capacity and improve throughput.

This exciting development is part of MACS' long term expansion plan, which includes purpose-built premises under construction in Paget – for its engineering and truck divisions.

This facility is due for completion in September and will see MACS continue to grow from strength to strength.

MACS opened its doors in Mackay in 1965 and services the mining, infras-

SERVICE: MACS Engineering provides onsite service vehicles.

structure, energy, civil construction, government and rural industries.

MACS designs, manufactures, supplies and installs light vehicle and truck bodies, equipment and accessories – specialising in complete turnkey fit outs.

MACS also specialises in mine spec vehicles and mine compliance. In addi-

tion, it provides an innovative engineering and fabrication services, including design, drafting and certification.

Its engineering division also provides a host of site services – ranging from welding and auto electrical to maintenance and servicing.

MACS Engineering works closely with its customers in the Bowen Basin

and Central Queensland – and also provides its products and services to customers throughout Australia.

MACS Engineering has more than 130 staff – including qualified and highly skilled tradespeople, apprentices and design engineers across each of its primary divisions of operations: light vehicles, trucks and engineering.

MACS offers a genuine one-stop solution, delivering a wide range of design, engineering, manufacturing, supply and installation services that provide low risk, value for money solutions. MACS is a mine fleet specialist, providing complete turnkey fitouts, to meet operator and compliance requirements and to ensure the vehicle is fit for purpose.

MACS is dedicated to continuous improvement and innovation in the engineered products and services it provides – including safety systems and equipment.

MACS has established close professional relationships with independent engineers and research institutes, to test its range of high quality, fit for purpose designs – to ensure these products meet the specific, stringent demands of its customers.

For more information on any of the MACS products or services visit www.macs.net.au or call 4951 6555 or visit the business at 1C Victoria St, Mackay.
